

Ease of use

PROTECT Travel.

10 YEARS WARRANTY

Protection for travelling with additional USB charger

Surges can be caused, for example, by lightning striking your premises. Lightning induces voltage surges in conductors and cables that can damage any connected equipment. Also switching in households, for example with fluorescent lamps and conventional ballast, can cause surges in the buildings wiring system. Effective protection provides AEG's surge protector series.

The PROTECT Travel. provides surge protection in the smallest of spaces. This makes it ideal for travelling or for applications in confined spaces. Often, the power quality in the country of travel is not sufficiently guaranteed. Be on the safe side and protect your laptop, cell phone or digital camera against overvoltage while on the move. With the additional USB charger unit, you save on extra chargers.

Key features:

- 3 surge protected sockets
- 2 USB chargers for cell phones or MP3 players
- indicator shows active surge protection
- compact dimensions for travelling
- 90 degrees rotating mains input cord

PROTECT Travel: technical specifications

Category III / D / T3 acc. to IEC 61643-1	PROTECT Travel.
Nominal input voltage	230 Vac, 50 / 60 Hz
Mains input	90° degree rotatable, angled safety plug
Load outlets	1 x safety socket, 2 EU sockets
Safety standard	KEMA-KEUR, KEMA GS
Protection technology	triple conductor L-N / L-PE / N-PE
Surge protection	up to 36.000 A
Dimensions approx. (B x H x D)	96 mm x 79 mm x 53 mm
Weight approx.	0,7 kg
Part number	600 000 7747
