Features

See Beyond the Game, Visualize Your Victory.

Curved for your viewing pleasure

MSI gaming monitors use a curved display panel that has a curvature rate of 1500R, which is the most comfortable and suitable for a wide range of applications from general computing to gaming. Curved panels also help with gameplay immersion, making you feel more connected to the entire experience.

Perfect Curved Multiscreen Setup

One perfect curved line for your monitors to create a glorious battlefield.

Mystic Light

Customize your MSI Gaming Desktop with Mystic Light. Make your build look on fire or cold as ice. You are in control. You can select any of the colors from the palette to match your systems' design, and more LED effects to choose.

Gaming Echo mode

Gaming Echo is a vibrant RGB back light design that will glow and flash based on the audio signals coming from your computer. While you are listening to your favorite tracks or having an intense battle, Gaming Echo will always be there to spice up your experience.

Gaming Echo

Stunning Visuals With the Most Criterion Format.

MSI Optix gaming monitor is equipped with HDR technology that can produce images with more details, wider range of colors, and look more similar to what is seen by the human eye when compared to traditional monitors.

HDR OFF

HDR ON

See Clear in the Dark

Get the jump on enemies before they even notice you. The Night Vision is built to be easy on the eyes. You're not afraid of the dark, are you?

Gaming OSD 2.0 App

Easy to use

Using keyboard & mouse to optimize monitor OSD function in a very easy way

Ray Tracing

OSD and gaming are both on your hand's control

Use your hand but out of control with your game

Gaming Features

180Hz Refresh Rate

You can experience amazingly fluent gaming visuals. which has the most benefit in fast moving game genres such as first person shooters, fighters, racing sims, real-time strategy, and sports. These type of games require very fast and precise movements, which an ultra-high refresh rate and fast response time monitor will put you ahead of your competition.

1ms Response Time

Response time matters for gaming

When playing sports, racing & fast-moving games like First Person Shooters (FPS), gamers generally don't give a good favor to a general display monitor with blurred images & other motion artifacts.

1ms Response Time

Response Time TES

True Colors

Wide Gamut Coverage

MSI Monitor Other Brand

The Optix Monitor has at least 35% more gamut coverage compared to general monitors. Gameplay colors and details will look more realistic and refined, to push immersion to its limits.

Adjustable Stand

Height Adjustment 0 ~ 130 mm

AMD FreeSync (Adaptive Sync)

Tearing!

Sometimes, when you playing game, you will see..

AMD FreeSync (Adaptive Sync)

Radeon FreeSync[™] ON Radeon FreeSync[™] OFF

Optix has built in FreeSync[™] technology to create the smoothest visuals for your gameplay. To do this, FreeSync[™] will sync your monitors refresh rate to GPU, which helps to eliminate screen tearing or stuttering. Enjoy the game the way it was meant to be enjoyed with ultra-smooth, lag-free visuals.

Frameless-Design

S MSi

EMS

Enjoy the latest games in the best immersion possible with the multi-monitor setup, and with a super narrow bezel, a better continuity between screens while playing games, working, or general computing,

Anti-Flicker

Č.

Anti-Flicker

Anti-Flicker

Flickering will cause pressure to your eyes.

Generic monitor displays normally have a flicker-rate of about 200-times per second, which is unnoticeable to the naked eye, but can cause fatigue over time. MSI Anti-Flicker technology provides a very comfortable viewing experience by reducing the amount of flicker.

Without Anti-Flicker

Less Blue Light

MSI gaming monitors are optimized to reduce eye strain by lowering the total amount of blue light, ensuring you a longer period of game time without fatigue.
