# T-FORCE GAMING DDR4 DARK

Awesome knight **armor**  
style heat spreader

The Team Group design team had built a heat spreader with an all new exterior design concept. The vigorous look of top notch armor style spreader transforms the memory device of the computer hardware into a valiant dark knight riding a dark horse.

## With complete coverage design and improve radiating performance **8%**

The design of DDR 4 DARK heat spreader surpasses DDR 3 DARK's. The heat spreader area is extended to the top and the two sides. Double layer heat spreader offers memory a better

protection. Complete coverage of the memory not only can enhance the radiating performance and maintain the system a long time stable operation, but also can solve the problem of overheating.

## The Only **4**-pieces heat spreader in the market

Other than the two-piece or three-piece heat spreader with cover on the market, Team Group releases the only four-piece heat spreader in the industry. Upper and lower layers are used to create a design texture of crossed lines and the killer look of a dark knight's armor. It is both unique and eye catching.

## Ultra low working voltage Save energy up to **40%**

With low working voltage 1.2~1.4V from DDR4 DARK , it is not only energy saving but it can also reduce the temperature and the heat generated to offer the high speed running memory a stable and long time operation.

## XMP2.0 **1** step overclocking technology

All DARK series support Intel XMP 2.0. It is only one step away to experience the high speed sensation of overclocking.

## QVL approved by motherboard manufacturers

Multiple compatibility verifications with mainstream DDR4 motherboards to make sure its stability with all motherboards on the QVL(Qualified Vendor List). Therefore, you wouldn't have to worry about compatibility issues when purchasing high speed memory.

## Main Feature

- Awesome knight armor style heat spreader
- Complete coverage of the top and both sides
- The Only four-pieces heat spreader in the market
- Selected high quality IC chips
- 1.2V~1.4V ultra low working voltage
- Support intel XMP 2.0 smart overclocking technology
- QVL approved by mainstream motherboard manufactures in the market

## Specification

Module Type	288 Pin Unbuffered DIMM Non ECC
