

Product Highlights

Gigabit Ethernet Speed

High-speed ports provide Gigabit Ethernet technology while remaining backward compatible for <u>connections to older computers and equipment</u>

Revolutionary Energy Efficiency

Innovative D-Link Green features help to conserve energy without affecting performance so you can reduce operating costs and protect the environment

Smart and Flexible Management

Powerful switch management functions can be performed through a web management interface or through the D-Link Network Assistant Utility

DGS-1100 Series

Gigabit Smart Managed Switches

Features

Physical

- Various selection of port counts, with or without PoE and fibre support
- Fanless design for silent operation (except for DGS-1100-10MP/10MPP/24P/26MP)

Green Technology

- Link Status detection
- IEEE 802.3az compliant
- Time-based PoE (PoE models excluding DGS-1100-05PD and DGS-1100-08P)

Advanced Features

- Bandwidth Control
- IEEE 802.1Q VLAN traffic segregation
- Port-based VLAN
- IEEE 802.1p QoS
- Surveillance VLAN
- Voice VLAN

Management Features

- Client-based utility or web-based GUI
- Built-in SNMP MIB¹

Video Surveillance Mode (MP/MPP Models)

- · Surveillance optimised web interface
- High PoE budget and PoE+ ports
- Per-port 6 kV surge protection
- ONVIF support

D-Link's DGS-1100 Series provides an affordable solution for SOHOs and Small and Medium Businesses as well as enterprise deployment, such as in branch offices and meeting rooms that require simple network management. Most models come in a compact desktop-sized metal case and feature a wide selection of Gigabit port configurations with optional Gigabit fibre uplink ports. There are 6 switches in the series supporting Power-over-Ethernet of which 1 can be powered by PoE with PoE-passthrough to power additional PoE-enabled devices, and 2 offer high-power-budget PoE for businesses looking to power VoIP phones, wireless access points or network cameras. The 5-port DGS-1100-05PD can be powered by a PoE switch and with its PoE-passthrough feature, can power 2 additional PoE-enabled devices. The 10-port DGS-1100-10MP supports up to 30W on eight ports with a power budget of 130W, whereas the DGS-1100-26MP provides 24 PoE-enabled ports, a power budget of 370W and all PoE-enabled ports support up to 30W. DGS-1100-10MPP supports up to 242W PoE power budget as well as 2 x 802.3bt/UPoE ports. Advanced management features, diagnostic and troubleshooting tools, and energy efficient technologies provide a flexible solution to suit your networking requirements.

Optimised for Video Surveillance

The DGS-1100 Series supports Auto Surveillance VLAN (ASV) which ensures the quality of real-time video for monitoring and control without compromising the transmission of conventional network data. Furthermore, DGS-1100-10MP, DGS-1100-10MPP and DGS-1100-26MP smart managed switches are the world's first PoE switches with ONVIF support with optional surveillance optimised web interface. This allows it to recognise ONVIF devices and integrate seamlessly with your surveillance network. You can also access in real-time vital information on your surveillance network such as surveillance topology and device status as well as PoE power and network bandwidth utilisation. Various power budgets, support for PoE+ standard and 6 KV surge protection make the DGS-1100-10MP, DGS-1100-10MPP DGS-1100-26MP switches a critical part of your surveillance infrastructure.

Auto Voice VLAN and Bandwidth Control

The DGS-1100 Series supports Auto Voice VLAN, which is best suited for VoIP deployments. This enhances the VoIP service by automatically placing voice traffic from an IP phone to an assigned VLAN. With higher priority and individual VLAN, these features guarantee the quality and security of VoIP traffic. Bandwidth Control can reserve bandwidth on a per port basis for important functions that require larger bandwidth or have high priority.

Advanced Features

DGS-1100 Series is equipped with advanced security features such as Static MAC, Storm Control, and IGMP Snooping. Static MAC allows users to create a MAC whitelist for specific ports, helping administrators limit network access to authorised devices only. Storm Control monitors broadcast, multicast, or unknown unicast traffic and will start blocking or discarding packets which could flood the network when the defined threshold is exceeded. IGMP Snooping is able to reduce the loading of L3 multicast routers and save bandwidth in network throughput.

Easy Troubleshooting

The DGS-1100 Series features Loopback Detection and Cable Diagnostics to help network administrators find and solve network problems quickly and easily. Loopback Detection is used to detect loops created by a specific port and automatically shut down the affected port. The Cable Diagnostics feature is designed for network administrators to quickly examine the quality of the copper cables, recognise the cable type, and detect cable errors.

Easy to deploy

The DGS-1100 Series supports an intuitive D-Link Network Assistant Utility and a web-based management interface. The D-Link Network Assistant Utility allows customers to discover all switches in the D-Link Smart Managed Switch family within the same L2 network segment. With this utility, users do not need to change the IP address of their PC, which also makes the initial setup of the Smart Managed Switches quick and easy. Switches within the same L2 network segment that are connected to the user's PC are displayed onscreen for instant access. This allows for extensive switch configuration and basic setup of discovered devices, including password changes and firmware upgrades. The graphic web-based management interface provides a user-friendly interface that enables network administrators to remotely control their network down to the port level.

If the worst should happen to your network you need the very best support and fast. Downtime costs your business money. D-Link Assist maximises your uptime by solving technical problems quickly and effectively. Our highly trained technicians are on standby around the clock, ensuring that award-winning support is only a phone call away.

With a choice of three affordable service offerings covering all D-Link business products, you can select the package that suits you best:

D-Link Assist Gold - for comprehensive 24-hour support

D-Link Assist Gold is perfect for mission-critical environments where maximum uptime is a high priority. It guarantees four hour around-the-clock response. Cover applies 24/7 for every day of the year including holidays.

D-Link Assist Silver - for prompt same-day assistance

D-Link Assist Silver is designed for 'high availability' businesses that require rapid response within regular working hours. It provides a four hour response service Monday to Friday from 8am to 5pm, excluding holidays.

D-Link Assist Bronze - for guaranteed response on the next business day

D-Link Assist Bronze is a highly cost-effective support solution for less critical environments. Response is guaranteed within eight business hours Monday to Friday from 8am to 5pm, excluding holidays.

D-Link Assist can be purchased together with any D-Link business product. So whether you're buying switching, wireless, storage, security or IP Surveillance equipment from D-Link, your peace of mind is guaranteed. D-Link Assist also offers installation and configuration services to get your new hardware working quickly and correctly.

Technical Specifications	2		
General	DGS-1100-05	DGS-1100-08	DGS-1100-16
Size	Desktop	Desktop	11-inch Desktop/Rackmount Size, 1U Height
Number of Ports	• 5 10/100/1000 Mbps	• 8 10/100/1000 Mbps	• 16 10/100/1000 Mbps

VLAN	Port-based VLAN	• VLAN Group
VLAIN	802.1Q tagged VLAN	Supports 32 static VLAN groups
	Surveillance VLAN	• Max. 4094 VIDs
	Voice VLAN	
	Management VLAN	
L2 Features	Flow Control	Loopback Detection
	802.3x Flow Control	 Cable Diagnostics
	 HOL Blocking Prevention 	Port Mirroring
	Jumbo Frames up to 9216 Bytes	One-to-One
	IGMP Snooping	• Statistics
	• IGMP v1/v2 Snooping	• Tx Ok
	• Supports 32 Groups	• Tx Error
	Static Trunk Trunk Trunk Trunk Trunk	Rx Ok Rx Error
	• 2 groups, 2-4 ports per group	• KX Error
Quality of Service (QoS)	802.1p Quality of Service	 Bandwidth Control
	 4 queues per port 	 Port-based (Ingress/Egress, min. granularity 8 Kb/s)
	Queue Handling	
	• Strict	
	Weighted Round Robin (WRR)	
Security	Static MAC Address	Broadcast/Multicast/Unknown Unicast Storm Control
	• Up to 32 entries	
Management	Web-based GUI (Supports IPv4)	Client-based Utility (SmartConsole Utility)
D-Link Green	Power Saving by	Compliant with IEEE 802.3az Energy Efficient Ethernet
	Link Status, Cable Length	• Compliant with RoHS 6
RFC Standard List	• RFC 768 UDP	RFC 951 BootP client
	• RFC 791 IP	 RFC 1542 BootP/DHCP client
	• RFC 792 ICMP	• RFC 1945 HTTP/1.0
	• RFC 793 TCP	• RFC 2647 802.1p
	• RFC 826 ARP	 RFC 2236, 4451 IGMP Snooping
