## Installation Precautions

- Make sure to remove the protective film attached to the projector.
  - If you use the projector without removing the protective film, the product may not work properly.
- Place the projector in a well-ventilated environment.
  - To prevent internal heat from building up, install the projector in a well-ventilated place.

Do not place anything near the projector as this may block its air vents. If the air vents are blocked, the internal temperature will increase.

- Do not place the projector on a carpet or rug. If a product has its inlet vent on its bottom, do not block the vent and use the product on a leveled solid surface.

- Be sure to prevent foreign objects, such as scraps of paper, from entering the inlet vent.

- Leave an adequate distance (30 cm or more) around the projector.

- Do not place the product in a hot or humid environment.
  - Do not place the product in a hot, cold, or humid environment.
- Do not place the product in a dusty place.
  - This may cause fire.
- Never open any cover on the projector. There is a high risk of electric shock.
- The projector is manufactured using high-precision technology. You may, however, see tiny black dots and/or bright colored dots (red, blue or green) that continuously appear on the projector screen. This is a normal result of the manufacturing process and does not indicate a malfunction.
- The remote control may not work in an environment where a lamp equipped with electronic ballasts or a three-wavelength fluorescent lamp is installed. Replace the lamp with an international standard lamp for the remote control to work normally.

## Projection Distance per Screen Size

- 1 Place the projector on a sturdy, level surface, together with the computer or audio/video source.
- 2 Place the projector at an appropriate distance from the screen. The distance between the projector and the screen determines the actual size of the image.
- 3 Position the projector so that the lens is perpendicular to the screen. If the lens is not perpendicular to the screen, the projected image will look distorted. If the screen image is crooked, use the Keystone function. (See page 23.)
- 4 Connect the power cords of the projector and the connected devices to the wall outlet.

## Do not turn off the projector

### Do not turn off the projector

The lifetime of the lamp depends on the environment in which the projector is used.

You can check how long the projector lamp has been used in the Option menu.

Make sure to replace the lamp in the following situations:

- The projected image gets darker or starts to deteriorate in quality.
- The lamp warning indicator is red.
- The message **Replace the lamp** appears on the screen when turning the projector on.

### Be careful when replacing the lamp

- Turn off the power by pressing the **POWER** button on the remote control or on the control panel.
- Do not remove the power cord when the operation indicator is blinking in orange, i.e. the fan is working (about 20 sec.). When the operation indicator turns orange, remove the power cord.
- Allow the lamp to cool down for 1 hour before replacing it.
- Replace only with the same type of lamp from a reseller or an LG Electronics Service Center. Using another manufacturer's lamp may damage the projector and lamp.
- Remove the lamp only when replacing it.

- Keep the lamp unit out of reach of children. Keep the lamp away from heat sources such as radiators, stoves etc. There is a risk of fire or burning.
- Do not expose the lamp to liquids or foreign materials. The lamp may burst.
- Do not insert any flammable or metal objects into the lamp socket after removing the lamp. This can result in electrical shock or damage the product.
- Fix the new lamp with screws securely. If it is not securely fixed, the projected image may become darker and there may be a fire risk.
- Do not touch the front glass of the new lamp or the glass of the lamp container. Picture quality and lamp lifetime may suffer.

### Purchasing a replacement lamp

Check the lamp model and then purchase it from an LG Electronics Service Center. (Use a lamp designed specifically for the projector, otherwise it may cause damage to the projector.)

### Disposing of the lamp

Dispose of the used lamp by returning it to an LG Electronics Service Center.

## Cleaning

### Cleaning the Lens

If there is any dust or staining on the lens surface, you must clean the lens.

Use an air spray or a cleaning cloth to clean the lens.

To remove dust or stains, use an air spray or apply a small amount of cleaning agent onto a swab or soft cloth to lightly rub the lens.

Please be aware that liquid may flow into the lens if the product is sprayed directly onto the lens.

### Cleaning the Projector Case

To clean the projector case, first unplug the power cord.

To remove dust or stains, use only a dry, lint-free, soft cloth to polish the lens.

Do not use alcohol, benzene, thinners or other chemicals, which may damage the case.

### Cleaning the Air Inlet and Outlet

Dust or foreign objects can easily build up in the air inlet and outlet. Remove dust and foreign objects from the inlet and outlet regularly, clean the air inlet (Air filter) regularly and replace it with a new one if the filter is damaged.

If you continue to use the projector with dust accumulations in the air inlet and outlet, the projector may malfunction due to its internal components overheating.

## Replacing the lamp

- 1 Turn off the projector and unplug the power cable from the outlet and place it on a table or a flat surface.
  - Allow the lamp to cool down for 1 hour before removing the used lamp from the projector because it is very hot.
- 2 Unscrew the screw fixing the lamp cover using a screw driver or its equivalent. After removing the screws, slide out the lamp cover.

Lamp cover fixing screw

- 3 After opening the lamp cover, unscrew the 3 screws that fix the lamp using a screw driver or its equivalent.

Screw

- 4 Slide out the fixed lamp from the hitch part.

- 5 Hold the lamp and pull it out slowly to remove the lamp case.
- 6 Insert the new lamp case gently into the correct position. (Check if it is correctly positioned.)
- 7 Tighten the screws you removed in step 3. (Check if the lamp is securely fixed.)
- 8 Close the lamp cover and tighten the screw loosened in step 2 to fix the cover.
  - If you turn on the projector while the lamp cover is open, the lamp warning indicator will blink in green and the projector will not be turned on.

### NOTE

- Make sure to use the same type of lamp for replacement. If the lamp cover is not closed correctly, the projector will not be turned on. In this case, check if the lamp is correctly fixed and contact the LG Electronics Service Center.

# SERIAL COMMUNICATION FUNCTION

## Using Serial Communication

If the projector is connected to a PC through an RS-232C cable, you can use the PC to control functions of the projector such as power On/Off or input selection, etc.

It cannot be used with the eZ-Net Manager concurrently. For serial communication, set **LAN** to **Off** in the eZ-Net Manager.

This function may not be available for a particular menu or input mode.

## Establishing Serial Communication

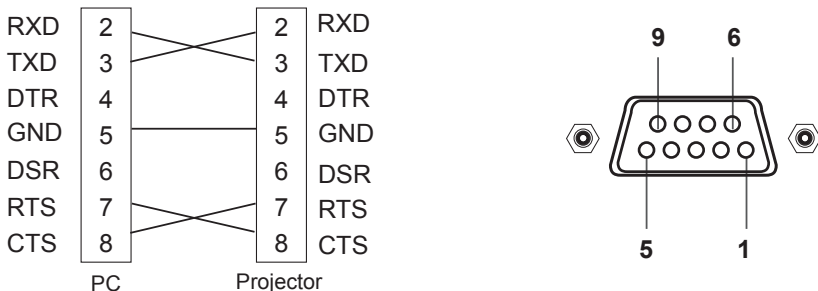

Connect the RS-232C (serial connector) of the PC to the RS-232C connector at the back of the projector.

You need to purchase a cable to connect the RS-232C connectors as it is not provided as an accessory.

\* A RS-232C cable is necessary for the remote control of the projector (see Figure 1).

[Figure 1] RS-232 Connection Diagram

\* There is no connection to Pin 1 and Pin 9.

### Communication Parameter Setup

- Baud Rate: 9600 bps (UART)
- Data Length: 8 bit
- Parity: none
- Stop bit: 1 bit
- Flow Control: none
- Communication code: ASCII code

## Communication Protocol

### 1. Transmission

[Command1][Command2][ ][Set ID][ ][Data][Cr]

- \* [Command1]: The first command to control the projector (k, j, x, m, n ASCII code, 1 Character)
- \* [Command2]: The second command to control the projector (ASCII code, 1 character)
- \* [Set ID]: You can adjust the set ID to choose desired monitor ID number in option menu. Adjustment range is 1 to 99. When selecting Set ID '0', every connected set is controlled. Set ID is indicated as decimal (1 to 99) on menu and as Hexa decimal (0x0 to 0x63) on transmission/receiving protocol.
- \* [Data]: To transmit command data (hexadecimal). Transmit 'FF' data to read status of command.
- \* If the data is 'FF', it means data read mode.
- \* [Cr]: Carriage Return  
It corresponds to ASCII code '0x0D'.
- \* [ ]: ASCII code 'space (0x20)

### 2. OK Acknowledgement

[Command2][ ][Set ID][ ][OK][Data][x]

\* The set transmits ACK (acknowledgement) based on this format when receiving normal data. At this time, if the data is data read mode, it indicates present status data. If the data is data write mode, it returns the data of the PC computer.

### 3. Error Acknowledgement

[Command2][ ][Set ID][ ][NG][Data][x]

\* If a set receives an abnormal piece of data such as a non-supported function or there is a communication error, it returns ACK in the above format.  
Data [00]: illegal code  
(This command is not supported.)
