AMD FreeSync™

With FreeSync, the game's frame rate is determined by your graphics card, not the fixed refresh rate of the monitor. This means the monitor's frames are synced with the graphics card's frames, which eliminates screen tearing and delivers very smooth gaming experiences

144Hz

With a rapid refresh rate of 144Hz, Acer XZ1 Series shorten the time it takes for frame rendering, lower input lag and provide gamers an excellent in-game experience.

BlueLightShield™

BlueLightShield™

Acer BlueLightShield™ reduces the exposure ratio of blue light, which can potentially cause long-term eye damage, by adjusting color hue and brightness

Curved 16:9

With Curvature of 1800r, Acer XZ1 series give you a more enveloping viewing experience because their screens wrap around you, thus drawing you deeper into everything.
