See the [Dell Commercial Docks Family Brochure](#) for more information on our entire docking portfolio.

* Latitude Chromebook Enterprise notebooks are USB-C systems and the recommended dock is the Dell Dock WD19 / WD19S with 90W power adapter. The Dell Thunderbolt Dock WD19TB / WD19TBS, Dell Thunderbolt 4 Dock WD22TB4 and Dell Performance Dock WD19DC / WD19DCS are supported but functionality is reduced to single USB-C, the same as the Dell Dock WD19 / WD19S.

1 Via single connection on the Dell Performance Dock WD19DC / WD19DCS, functionality reduced to single USB-C, the same as the Dell Dock WD19 / WD19S.

2 Precision 7000 series mobile workstations require more power than 130W, so when docked with the Dell Dock WD19 / WD19S (130W/180W), Dell Thunderbolt Dock WD19TB / WD19TBS or Dell Thunderbolt 4 Dock WD22TB4, the workstations need to be plugged in externally for optimal operation. For the best experience with Precision 7000 series mobile workstations, choose the Dell Performance Dock WD19DC / WD19DCS. The WD19DC / WD19DCS dock comes with a dual USB-C connector that provides up to 210W of power delivery, so you no longer need an additional power adapter.

3 Older Thunderbolt systems have partial compatibility with Dell Thunderbolt 4 Dock WD22TB4. Only one of the ports on the Thunderbolt module will function as Thunderbolt, the other will only work as USB/DP.

Note: When connected to non-Thunderbolt systems, the Dell Thunderbolt Dock WD19TB / WD19TBS and Dell Thunderbolt 4 Dock WD22TB4 will not retain its Thunderbolt functionality.
